### SKILLS

#### JavaScript

7+ years experience writing modern JavaScript. Experience using latest features, Promises, etc. Have worked in frontend as well as backend. Familiar with Angular, Node.js, TypeScript, etc.

#### PHP

7+ years experience writing modern, secure PHP web applications. Experience with PHP7 & PHP8. Have worked with frameworks like Laravel, Composer, PHPUnit, etc.

#### SQL

7+ years experience designing database schemas & writing efficient queries for database-driven apps.

#### More

Other technologies I've worked with include:

REST APIs • Git • Express.js • Mustache.js • Twig • Apache • Symfony • CakePHP • Python • Kafka • Elasticsearch • C/C++ • Java • C# • Dart • Flutter • Linux • macOS • Windows

### EXPERIENCE

#### MedBridge

Software Engineer II • October 2021 - Present  
I work on a team that maintains critical parts of our company software, spanning multiple services & technologies.

#### Stratozen / ConnectWise

Software Developer • April 2020 - October 2021  
Created & maintained multiple web applications including critical internal software, client-facing analytics, data reporting scripts, and more.

#### Pippin Design

Web Developer • May 2016 - April 2020  
At this design firm, I worked on various websites. Client needs varied from simple marketing pages, to ecommerce shops, to full web applications such as job boards, user content portals, and cabin rental.

#### Koz, Inc.

Web Developer • March 2019 - November 2019  
I maintained several client-facing web apps, all of which had local user login systems & interacted with REST APIs like Facebook, Twilio, and more.

#### FanZoos

Junior Web Developer • October 2015 - May 2016  
This startup needed a Phase 1 web application, mainly focused on driving user engagement & signups. As the sole developer on the project, I created a user login system (both local & SSO), an admin analytics dashboard, and a user content uploading system.
