SKILLS

JavaScript

5+ years experience writing modern JavaScript. Experience using modern ES6 features, Promises, etc. Have worked in frontend as well as backend. Have worked with frameworks & libraries like Node.js, Vue.js, React, etc.

PHP

5+ years experience writing modern, secure PHP web applications. Have worked with software like Laravel, Composer, PHPUnit, etc.

SQL

5+ years experience designing database schemas & writing efficient queries for database-driven apps.

More

Other technologies I've worked with include:

REST APIs • Git • Express.js • Mustache.js •
Twig • Apache • Symfony • CakePHP •
Python • Kafka • Elasticsearch • C/C++ •
Java • C# • Dart • Flutter • Xamarin • Linux •
macOS • Windows

EXPERIENCE

ConnectWise April 2020 - Present

At cybersecurity company ConnectWise (formerly StratoZen), I have created & maintained multiple web applications including critical internal software, client-facing analytics, data reporting scripts, and more.

Pippin Design May 2016 - April 2020

I developed dozens of custom websites for clients by turning designers' mock-ups into modern web pages complete with backend functionality. I worked with many APIs, including Twitter & PayPal. Most websites were developed in WordPress.

Koz, Inc. March 2019 - November 2019

At Koz, Inc., I maintained several client-facing web applications. Most software interacted with REST APIs for services like LinkedIn, Facebook, Twitter, Twilio, etc.

FanZoos October 2015 - May 2016

As a junior web developer, I was tasked with developing the first phase of the company project. Initially it was a Coming Soon page, which later evolved to have an Admin area with tools & analytics, content uploading, etc. It progressed further to allow user authentication locally & via Facebook, as well as user video uploading via the Vzaar API.
